Good morning,

The Pre-RD group is kicking off today's fish tracking activities in SIL. Today's activities will include maintenance checks for all 34 receivers. Battery life, memory, tilt angle, and fish hits will be documented. Receivers oriented at a tilt angle of 15° or greater will require a reset and will be performed at another time. Included are photos of various H&S items on board the R/V "FRV-1".

Thanks,

Jonni
